Saturday, April 15—Easter

Tuesday, July 4—Independence Day

Saturday, November 11—Veteran's Day

Tuesday, December 26—Christmas

Latex Paint—Non Hazardous When Dried Up

EASY DIY.....

Once latex paint is dried it is okay to place in a separate bag down inside your garbage for regular collection at the curb. Easy do it yourself—take a disposable aluminum baking pan and pour the paint about 1 inch deep, then pour clay based cat litter over the paint to dry it up. If you leave it outside in the sun it will dry in a couple of hours. Simply scoop the large dry clumps in the garbage bag and repeat the steps until you are finished drying up your latex paint. Leave the empty paint can in the sun to dry the residual on the inside walls of the can and dispose of them in the same garbage bag.

This project is partially funded under a grant contract with the State of Tennessee.
