MONITORED OZONE EXCEEDANCE
“CODE ORANGE OZONE ADVISORY”
“UNHEALTHY FOR SENSITIVE GROUPS”
Wednesday, August 31, 2011

For Immediate Release as of 5:20 PM:

Wednesday, August 31, 2011

Memphis, TN. –In cooperation with the Arkansas Department of Environmental Quality (ADEQ); the Arkansas Department of Health (ADH); and the Mississippi Department of Environmental Quality (MDEQ), the Shelby County Health Department has issued a **“CODE ORANGE” -- OZONE ADVISORY**, due to a monitored exceedance of the 8-hour National Ambient Air Quality Standard (NAAQS) for ozone **for the Memphis Metropolitan Area**. The Memphis Metropolitan Area includes Shelby County, Tennessee, Crittenden County, Arkansas, and DeSoto County, Mississippi. The afternoon levels of ozone exceeded the eight-hour NAAQS at the Orgill monitor in Shelby County, TN. Under existing Air Quality Index guidelines, current air quality throughout the Memphis Metropolitan Area has become **“Unhealthy For Sensitive Groups”** and is expected to remain so until after sunset this evening. *Pollution emissions, a stagnant atmosphere, clear skies, and high temperatures* are the primary factors responsible for this afternoon’s poor air quality. **MATA bus and trolley fares will be discounted today, as this advisory was previously forecasted.**

| Health Precautions: | OZONE REDUCTION TIPS RECOMMENDED DURING “CODE ORANGE OZONE ADVISORIES” |
|--|--|
| <ul style="list-style-type: none"> • For Active Children and Adults • For Persons With Respiratory Difficulties | |
| <ul style="list-style-type: none"> • Limit prolonged outdoor activities during afternoon hours • High ozone levels can cause nose, eye, throat, and lung irritation • High ozone levels can aggravate existing conditions and lead to increased potential for illness in this sensitive group | <ul style="list-style-type: none"> • Refuel cars and lawnmowers after 7:00 pm, avoid spills and do not “top off” tanks • Carpool or mass transit • Combine errands instead of many separate trips • Drive less, especially during peak hours or hot days |
